UNDERGROUND DETECTION AND PROTECTION PRODUCTS

■ TRACER WIRE

Copperhead® Copper-Clad Steel (CCS) Tracer Wire is the most accurate way to detect buried pipes and cables. Strong and highly conductive, corrosion resistant and withstands the rigors of underground construction.

Copperhead® CCS Tracer Wire is designed for open cut, directional drilling, and pipe bursting.

SERVICE	WIRE COLOUR
Water	Blue
Sewer	Cream
Gas	Yellow

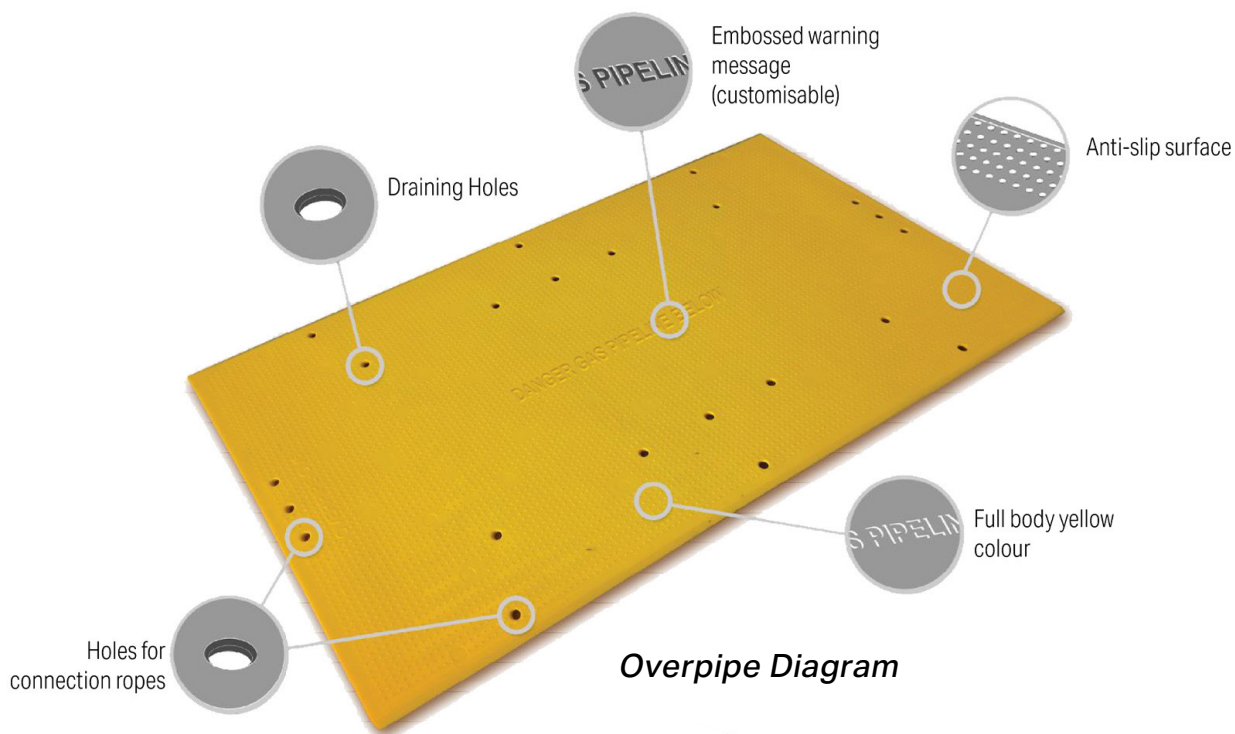

PRODUCT CODE	DESCRIPTION	BREAKING STRAIN
1230YHS1000	Tracer wire 12AWG HS CCS 2mm x 305m Yellow	522kg
1245CEHS1000	Tracer wire 12AWG Soloshot 2mm x 305m Cream	522kg
1245CEHS2500	Tracer wire 12AWG Soloshot 2mm x 760m Cream	522kg
1245YEHS1000	Tracer wire 12AWG HS CCS 2mm x 305m Yellow	522kg
1245YEHS2500	Tracer wire 12AWG Soloshot 2mm x 760m Yellow	522kg
1430BHS1000	Tracer wire 14AWG HS CCS 1.6mm x 305m Blue	128kg
1430YHS1000	Tracer wire 14AWG HS CCS 1.6mm x 305m Yellow	128kg
1430YHS2500	Tracer wire 14AWG HS CCS 1.6mm x 760m Yellow	128kg
1430YHS500	Tracer wire 14AWG HS CCS 1.6mm x 150m Yellow	128kg
1830BHS1000	Tracer wire 18AWG HS CCS 1.0mm x 305m Blue	48kg
1830YHS1000	Tracer wire 18AWG HS CCS 1.0mm x 305m Yellow	48kg
1830YHS2500	Tracer Wire 18AWG HS CCS 1.0mm x 760m Yellow	48kg
1830YHS500	Tracer Wire 18AWG HS CCS 1.0mm x 150m Yellow	48kg

■ OVERPIPE® PROTECTION PLATES

Overpipe® is designed to provide physical cover over high pressure gas pipelines and serves as a visual warning for machinery operators. It is 15mm thick virgin polyethylene plates, brightly coloured with an embossed warning message.

Overpipe® provides long-term mechanical protection for any vulnerable buried assets and is backed by a 50-year warranty. Available in a range of widths to suit different trench sizes.

■ DETECTABLE AND NON-DETECTABLE TAPES

Detectable and Non-Detectable Underground Warning Tapes are coloured polyethylene tapes printed with a warning message to identify underground pipes and cables to New Zealand Standards.

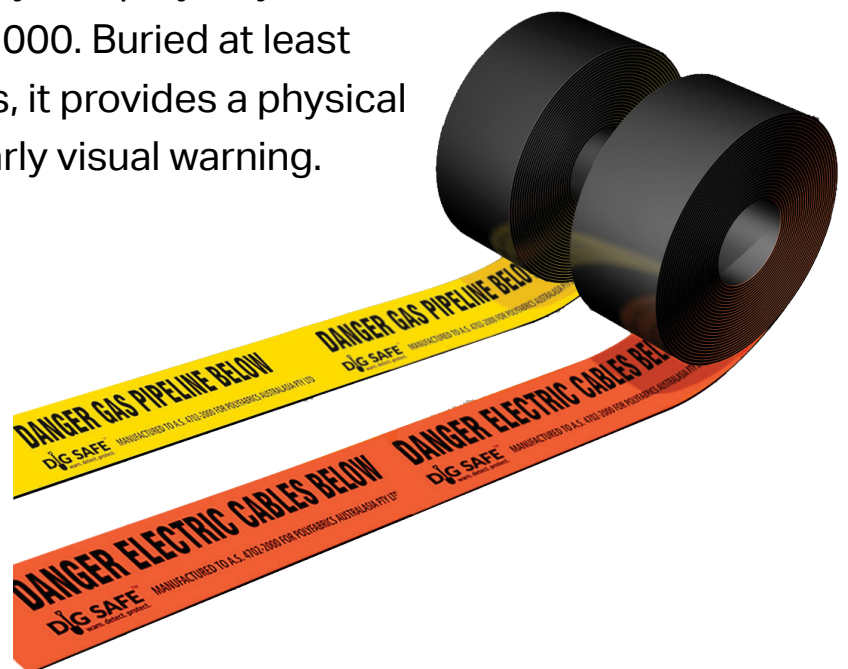

■ CABLE COVER

Our Cable Cover is made from recycled polyethylene to Australian standard AS 4702-2000. Buried at least 600mm above cables or pipelines, it provides a physical protective barrier as well as an early visual warning.

Cable Cover resists penetration from manual impacts (such as picks) and will last for decades underground without degradation.

Custom colours and text are available.
